

Lines that Last

About

For Clients in Sydney, Newcastle, The Hunter, Central Coast, Illawarra, or Port Stephens, Dolphin Line Marking® (Dolphin) provides “Lines that Last”.

The 24/7, 365 Dolphin services include line removal, pressure cleaning, concrete sealing, fixtures, products, design and layout services and timely project management.

It is the Dolphin key promises that distinguish it from the others. These include technicians arrive on time, clean up, complete projects to agreed time schedules and on budget, according to WHS requirements and with unparalleled efficiency.

The owner of Dolphin, Peter Siegmund is acclaimed for his timely response to quoting requests, consistently high service, fast turnaround of projects and immaculate application of “Lines that Last”. And Peter ensures that Dolphin abides by all relevant WHS guidelines and maintains insurance policies for the protection of staff, clients, and the public.

Clients

Dolphin clients include universities, colleges, schools, civil works, warehouses, workshops, factories, shopping centres, airports, office car parks, sporting venues, and offices.

Line Markings

Whether you require line marking services for carparks, warehouse safety, workshop logistics, new or existing parking lots, or shopping centres Dolphin specialises in “Lines that Last”.

There is more to a parking lot layout than lines and arrows; Dolphin can incorporate all kinds of text, signs, and products to guide customers, increase workflow efficiency and maximise safety.

As well as the standard line markings, Dolphin offers other services such as caution/hazard strips, car park numbers, logo in car bays, pedestrian crossings, disabled /pram spots, reserved spots, speed limits, walkways/driveways, different coloured markings, arrows and workshop safety & logistics.

Warehouse & Workshop Line Markings

Why do you need to line marking for your warehouse or workshop? The many reasons for line markings include better navigation, improved productivity, accessibility, and safety.

Warehouse and workshop line markings also help you to:

- Delineate safe walkways for staff & clients
- Allocate hazardous waste disposal spaces
- Assign specific transport vehicles & heavy machinery access
- Improve the efficiency of workflow
- Decrease the risk of workplace accidents

Services

Dolphin clients are motivated by a desire for exceptional safety and presentation of their roads, offices, shopping centres, workshops, parking lots and warehouse spaces.

In addition to applying planned lines, Dolphin can recommend parking lot designs and layouts to suit your specific needs.

If your current line markings are fading, Dolphin can refresh and make them visible and long lasting. Also, Dolphin can seal surfaces after the lines have been laid.

When you need someone to clean surfaces, Dolphin provides pressure cleaning services to spruce up your workshops, roads, and parking spaces.

Products

Dolphin is a one shop stop for carpark hardware that includes wheel-stops, bollards, speed humps, height clearance bars, corner guards, convex mirrors, pipe protectors, expansion joint covers, bike racks, stops, bollards, speed humps, and logo stencils.

If you want a supercharged response for line marking quotes and services ring Peter 0408 491 820! or email admin@thedolphingroup.com.au
